Senior ML Engineer

Summary

Machine Learning Engineer experienced in developing and deploying AI and ML models at scale, maintaining ML pipelines, and monitoring performance for real-time production workloads. Integrated large language models and ML algorithms into production systems to improve automation and decision-making. Implemented CI/CD/CT workflows for ML models on AWS SageMaker and worked on cloud architectures, containerization, deployment, and alerting.

Skills

Machine Learning, Python, ML pipelines, LLMs, AI, Docker, Containerization, CI/CD, Monitoring, Automation, AWS Sagemaker, VertexAi, LangChain, LlamaIndex, PyTorch, Cloud Architecture, Backend Development, Communication skills

Experience

Technical Lead, Dreamverse Holdings

Jan 2024 – Present | Johannesburg, Gauteng

- Developed and deployed AI and ML models at scale, maintaining ML pipelines, monitoring performance, and automating production workloads for real-time applications.
- Integrated LLMs and ML algorithms into production systems and optimized models for real-time deployment, improving client decision-making and automation.
- Built client web and mobile applications, ran performance benchmarks, and created CI/CD pipelines for building and deploying applications with high availability and security.

Volunteer Software Developer, Wikimedia

Oct 2023 – Present | Remote

- Migrated machine-generated article descriptions from Toolforge to Liftwing, ensuring smooth and efficient operation of article-description inference services.
- Completed operations and lower-level engineering tasks across Data Platforms teams, including the Machine Learning Team building ML services for Wikimedia sites.
- Improved Istio mesh traffic transparent proxy capabilities for external domains accessed by Lift Wing, enhancing service connectivity and performance.
- Developed and maintained backend services and features for Anti-Harassment tools, ensuring operational quality and a safe environment for users.
- Contributed to the Machine Learning, Data-Platform-SRE, and Anti-Harassment teams.
- Participated in Pilot-Flag and Test-Grounds initiatives to support community involvement and improve the quality and relevance of ML models.

Research Associate: Python Developer, UJ PEETS

Jan 2021 – Dec 2023 | Johannesburg, Gauteng

- Used AWS SageMaker to implement and maintain continuous integration, delivery, and testing (CI/CD/CT) workflows for ML models.
- Established scalable automated processes for data analysis, model development, and implementation to support continuous improvement.

- Designed a Python-based GUI Decision Support System for risk-based water quality guidelines, improving user accessibility and interaction.

Full Stack Developer, Penyesa SA

Dec 2018 – Dec 2020 | Sandton, Gauteng

- Worked on cloud architectures, application containerization, deployment, alerting, monitoring, and automation.
- Authored and maintained CI/CD pipelines using AWS developer tools including AWS CodePipeline and AWS CodeBuild.
- Integrated a serverless API with AWS API Gateway and other AWS services.

Education

Electrical and Electronics Engineering (BEng studies; incomplete), University of Johannesburg (2017–2018)

Certifications

AWS Certified Cloud Practitioner (expired), Amazon Web Services (2018)
