Full Stack Software Engineer

Summary

Builds web and mobile applications, front-end features, and backend services while ensuring high availability and security. Integrates a serverless API with AWS API Gateway and authors CI/CD pipelines using AWS developer tools. Designs Python-based systems and integrates machine learning algorithms into production systems to improve automation and decision-making.

Skills

Python, JavaScript, TypeScript, C#, React, Node.js, NestJs, Dot Net, AWS, Google Cloud Platform, Docker, CI/CD, Backend Development, Front-End Development, Web Development, AWS API Gateway, Data Analysis, Machine Learning

Experience

Technical Lead, Dreamverse Holdings

Jan 2024 – Present | Johannesburg, Gauteng

- Built client web and mobile applications, ran performance benchmarks, ensured high availability and security, and created automation pipelines to build and deploy web applications.
- Integrated large language models and machine learning algorithms into production systems, optimizing real-time deployment to improve client decision-making and automation.
- Developed and deployed AI and machine learning models at scale to automate production workloads, monitor performance, and maintain ML pipelines for real-time applications.

Volunteer Software Developer, Wikimedia

Oct 2023 – Present | Remote

- Developed and maintained backend services and Anti-Harassment tools for operational quality, ensuring a safe and inclusive environment for users.
- Developed and maintained front-end features, ensuring robustness and seamless user interaction.
- Completed operations and lower-level engineering backlog tasks across multiple Data Platforms teams, including the Machine Learning Team.
- Contributed to the Anti-Harassment, Machine Learning, and Data-Platform-SRE teams.

Research Associate: Python Developer, UJ PEETS

Jan 2021 – Dec 2023 | Johannesburg, Gauteng

- Designed a Python-based GUI Decision Support System for Risk-Based Water Quality Guidelines, improving user accessibility and interaction.
- Established scalable automated processes for data analysis, model development, and implementation to support continuous improvement.
- Documented and communicated results, insights, and patterns to stakeholders, ensuring transparency and effective information sharing.

Full Stack Developer, Penyesa SA

Dec 2018 – Dec 2020 | Sandton, Gauteng

- Completed end-to-end web development of an ecommerce web store for a global audience.
- Integrated a serverless API with AWS API Gateway and AWS Services.

- Implemented and maintained CI/CD pipelines using AWS developer tools including AWS CodePipeline and AWS CodeBuild.

Education

Electrical and Electronics Engineering (BEng studies; incomplete), University of Johannesburg (2017–2018)

Certifications

AWS Certified Cloud Practitioner (expired), Amazon Web Services (2018)
